RELAY VRX+

RADIO. IN THE BAG.

WHAT IS IT?

It's RELAY, from Lawo, and it's bringing something new to broadcasting: the VRX Virtual Radio Mixer.

RELAY VRX is a powerful mixing console that runs in a virtualized PC environment. No racks of gear to devour space and money – RELAY Virtual Radio Mixers run on a standard PC or laptop*. The intuitive, multitouch-enabled screen interface makes RELAY easy to use.

RADIO IN A BAG.

The RELAY VRX^{4/8+} bundle is a fully-featured portable studio, complete with analog and digital I/O and 4- or 8-fader virtual mixer. Just tuck your touchscreen laptop loaded with RELAY software into the heavy-duty RELAY backpack along with your A__OnAir4 audio interface, grab your favorite mic and headset, and you're ready to make great radio from just about anywhere. RELAY is perfectly suited to:

- Breaking News Coverage
- Sporting Events
- Sponsored Remote Broadcasts
- Air Talent Home Studios Livestream Origination
- Podcast Production
- Disaster Recovery or Emergency Broadcasts
- "Pop-up" remote broadcasts from wherever your listeners are

On The Level.

Easy-to-read VU bargraph meters and PPM peak displays help ensure perfect levels.

What Time Is It?

Precision clock and timer readouts, with on-air „LIVE!“ tally.

As You Like It.

Instantly perform custom functions with the click of a User Key.

Dock It!

One click minimizes UI, so you can easily perform other tasks.

Be Scene.

Eight „snapshot“ locations set and recall custom mixer settings at a moment's notice.

Program On.

Two stereo mixing buses for off-air production and on-air magic.

Hear There.

Click PFL Key to audition audio prior to air in your headphones or speakers.

DSP Me.

RELAY plug-in apps let you sweeten any source. DSP tally lights when active.

Mixbot, At Your Service.

„A+“ indicator lights when exclusive Lawo Automix is active, performing intelligent one-click mixing of multiple sources.

Ready, Set, Go.

One-click channel On/Off gets your audio to air quickly.

Confidentially Speaking.

Automatic mono/stereo confidence meters help ensure there's never dead air.

Channel Open.

Selectable fader-start option eases production of fast-paced shows.

Gimme Access.

Access Key lets you assign per-fader settings for Automix, Autogain, timer options and more.

Monitor This.

Two independently-controlled monitor feeds for convenient control of speakers and headphones. Or, use independent bus selectors to construct dual, independent headphone feeds for multi-person show.

* The RELAY VRX^{4/8+} bundle "Radio In A Bag" includes 4- or 8-fader virtual mixer software, A__OnAir4 audio I/O interface and heavy-duty backpack; Windows® 10 laptop (user-supplied) is required.

MORE THAN JUST MIXING.

R3LAY doesn't stop with setting talent free – with R3LAY, producers can go on the road, too.

Because R3LAY takes advantage of today's insanely powerful modern PC platforms to mix broadcast audio, there's plenty of processing power left over. Using a variety of plug-in apps from R3LAY partners, R3LAY virtual mixers can actually take care of broadcast chores that a traditional console would require extra rack-mount hardware to perform.

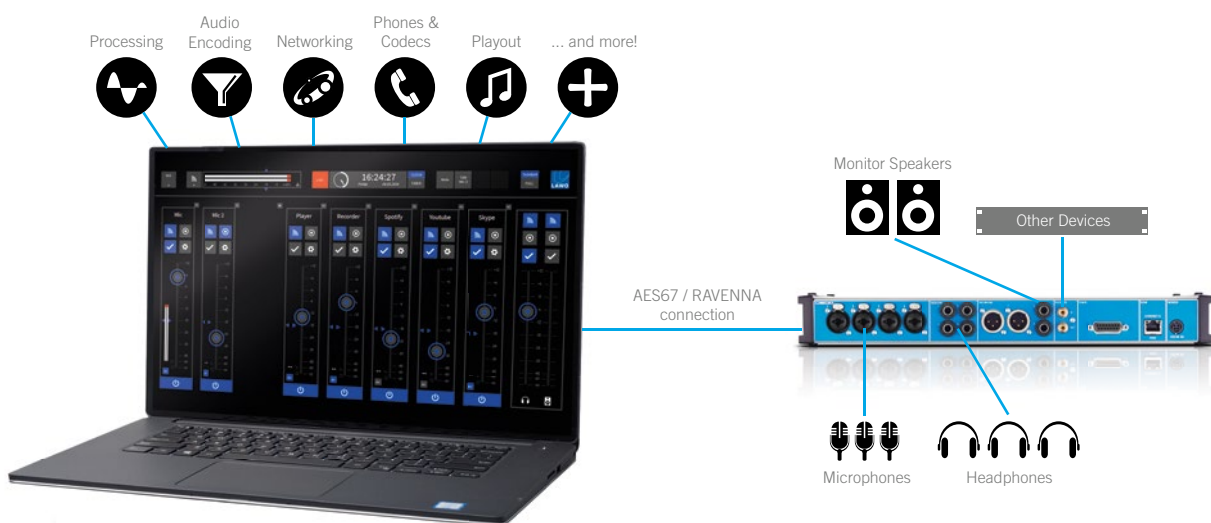

And, of course, R3LAY connects with standard Audio-over-IP hardware that supports the AES67 networking standard. In fact, some clients have told us that R3LAY is so powerful, they'll use it for in-station as well as on-the-go applications.

Native apps available for R3LAY include the following tools:

- Voice Processing
 - Final Audio Processing
 - Stereo Declipping
 - Profanity Delay
 - Automation/Playout
 - Bidirectional Codecs
 - Multi-line Broadcast Phones
 - Web Streaming/Encoding
- Virtual Sound Card Virtual Patch Bay

HOW WILL YOU USE R3LAY?

The possibilities may just be endless. For more ideas, visit www.R3LAY.com.
