

# TM-3 STUDIO UP-TIMER

The Radio Systems Studio Timer is designed as a versatile, easy to operate broadcast accessory with the capability of up-timing events to 99:59:59. The timer is easily remote controlled via external switches or console or tape machine closures.

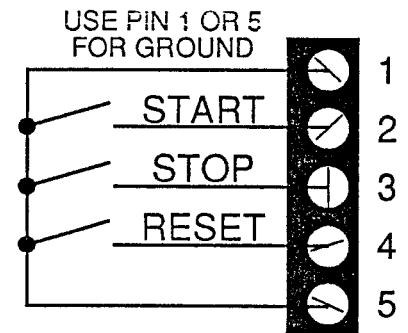

## Operation

Three front panel push-buttons control timer functions. "Reset" returns the display to 00:00:00 when in either the run or stop mode. "Start" initiates or continues the count, and "Stop" holds the display reading constant.

## Remote Control

All three functions can be remotely controlled via internal connections.

To access the internal barrier strip, remove the timer top cover. Strain relieve the remote cable by wire-tying to an internal screw or hole.

## Limited Warranty

Radio Systems warrants for one year from date of purchase, parts and labor on any unit returned to us for repair. Please ship the unit prepaid, Attn.: Repair Dept., with a note detailing the malfunction and reason for the repair. Repair and return of the unit will be made promptly. Within the warranty period, there is no charge for this service on all units which show no sign of misuse or unauthorized alterations.

# Operating Instructions for the CL-3 STUDIO CLOCK

The CL-3 clock may be set to function as either a clock or a timer. Switching between modes is only possible by powering down the unit. The CL-3 clock/timer powers up in the timer mode.

## To Operate as a Clock:

- 1) Press and hold both the start and stop buttons until the display reads 12:00:00.
- 2) To set the time of day press the stop button to advance the hours. Press the reset button to advance the minutes.
- 3) To start the clock, press the start button
- 4) To return to the timer mode, press and hold the stop and reset buttons until the display reads 00:00:00.

## To Operate as a Timer:

- 1) Press the start button to start timing
- 2) Press the stop button to stop timing
- 3) Press the reset button to return the display to 00:00:00
